PROFILE

I am a Computer Science student close to completing my studies, with a strong interest in web development. I have completed my internship at DigiEye, where I was involved in the creation and maintenance of websites.

My knowledge of web development is at an intermediate level, and I am constantly striving to improve by learning modern technologies and best practices.

At this time, I have completed my final two courses and am awaiting the completion of the process to obtain my degree.

I am seeking a part-time position or remote collaboration in order to further expand my professional experience and enhance my technical skills through real-world projects.

WORK EXPERIENCE

● Waitress / Bartender – Beach Bar Nous

Summer Seasons 2021 – 2023

During three consecutive summer seasons, I worked at Beach Bar Nous, undertaking customer service and bar support duties. This experience helped me develop strong communication skills, ability to work under pressure, team spirit, and adaptability in fast-paced and demanding environments.

● Cashier / Waitress – Proper Pizza

September 2024 – December 2024

I worked at Proper Pizza, handling customer service, order processing, and cash management tasks. This position strengthened my organizational skills, attention to detail, and sense of responsibility in daily financial and operational duties.

● Waitress – Evans Food & Drink, Thessaloniki

January 2024 – June 2025

I worked at Evans, a busy food and drink establishment in Thessaloniki. My responsibilities included customer service, order taking, and bar support. This experience further enhanced my teamwork abilities, professional attitude, and effective communication with both customers and colleagues.

● Waitress – Beach Bar (Paros)

July 2025 – September 2025

During the summer season, I worked at a beach bar in Paros as a waitress. The role required speed, organization, and the ability to serve customers efficiently in a high-demand environment, improving my professional consistency and ability to perform effectively under pressure.

- **Assistant in Website Development for Fitness Equipment Store**

- Supported website creation and content management to showcase fitness products.
- Gained basic skills in website-building tools and e-commerce.
- Collaborated with the team to improve the online customer experience.

Although my experience is limited, I developed valuable knowledge in digital product presentation and online store support.

- **Web Development Intern - DigiEye**

- Supported website creation and content management to showcase fitness products.
- Gained basic skills in website-building tools and e-commerce.
- Collaborated with the team to improve the online customer experience.

Although my experience is limited, I developed valuable knowledge in digital product presentation and online store support.

PROJECTS

- Created a 3D facial model using 3ds Max, focusing on human-computer interaction parameters as part of a university assignment.
- Completed programming assignments in C, Java, and Python.
- Modeled business processes using BPMN and DMN through the Camunda platform.
- Developed an Information System for a car repair shop using UML, As-Is/To-Be diagrams, and Epics.
